Transition Indicators of the European Bank for Reconstruction and Development: A Doubtful Guide to Economic Success

Martin Myant and Jan Drahekoupil

Competition & Change is unique in bringing together research and ideas in global business and political economy in ways that will interest social scientists inside and outside of schools of business and management. It features articles that use a variety of social science perspectives to develop understanding of broad business issues around globalization and financialization and their impact on economic organization and performance, social conditions, labour and policy frameworks. *Competition & Change* includes contributions on the changing social settlement between the state and the private sector and within labour markets, as well as those that address broader conceptualizations of restructuring capitalist relations. The journal is inter-disciplinary and welcomes submissions from international scholars with backgrounds in political and cultural economy, business economics, organizational sociology, economic geography, labour studies, international relations and development studies
