

Organic Reporting Session

Friday, March 13, 2015

We invite you to join us for a day to learn and share about the greatest challenge of organic production-**weeds**. We will discuss weed management through the soil health AND through mechanization.

The day will include 3 of research presentations conducted at Michigan State University. A panel of farmers will share their techniques and knowledge to manage weeds in the field through spacing, crop rotations and mechanization.

To conclude the day we will facilitate a discussion for **all** to identify key questions to address in future research. Grant resources will be discussed that can be used to address these issues. This program will focus on organic production systems, appropriate for all types of farming. We will conclude with light refreshments and a chance to catch up with new and old friends.

Weed management-research for practical approaches

SAVE THE DATE

Friday, March 13, 2015

8:30-4:00

Located at: Room 136 Brody Hall, Michigan State University

Address: 241 Brody Service Rd East Lansing, MI 48823

Visit www.MichiganOrganic.msu.edu to register

Cost is \$25 for farmers and \$30 for others (all inclusive)

Day will offer:

Research reports on weed biology and tillage systems

Farmers' panels of what works and what doesn't

Discussion to identify farmer/researcher-approach grant

Taste of Michigan Reception
