

GEO401: GEOGRAPHY OF PLANTS OF NORTH AMERICA

Learn about these plants and many more!

**Like to travel?
Wish you knew more about the
ecosystems you encounter?**

Consider enrolling in GEO401 for the fall of 2015, where we'll learn about the amazing variety of ecosystems across North America, from the Tropics to the Arctic and everything in between. We'll discuss different vegetation types and learn about the biogeographical principles that determine what grows where.

- Yes, there will be exams and a paper.
- 3 credits and no prerequisites!
- Weather permitting we'll take a few field trips (during class) to forests around campus.
- Questions? email Professor Kyla Dahlin at kdahlin@msu.edu

Fall 2015 Tues/Thurs 2:40-4:00 pm
