2017 Rachel Carson Distinguished Lecture

Science Advice for Policy Decisions: Is Anyone Listening?

Marcia McNutt

President, National Academy of Sciences

Former editor-in-chief, Science journals

Former director, U.S. Geological Survey

Dr. McNutt leads the academy, charged with “providing independent, objective advice to the nation on matters related to science and technology.” Throughout her career, she has played crucial roles during some of the nation’s and the world’s most pivotal events.

Tuesday, April 18 • 4 p.m.
MSU Union Ballroom

The 2017 Rachel Carson Distinguished Lecture is presented by the Center for Systems Integration and Sustainability and the Department of Fisheries and Wildlife and supported by the National Science Foundation; the MSU offices of the President, Provost and Vice President for Research and Graduate Studies; the College of Agriculture and Natural Resources; MSU AgBioResearch; the Environmental Science and Policy Program; and Sustainable Michigan Endowed Project.

Register at: <https://mcnutt.eventbrite.com>

Dr. McNutt’s lecture is open to the public and will be followed by a reception.
