

Are you **passionate about science communication** – and the role it can play in helping people adapt to a changing climate? Do you thrive in roles where you get to orchestrate many moving parts? We're the **Midwest Climate Adaptation Science Center (CASC)**, hosted at the University of Minnesota, and we'd love to meet you.

Communications Manager, Midwest CASC

Full Time | Hybrid

- * Starting range: \$60,482–71,156
- * Comprehensive benefits package
- * Onsite more than 50% of the time

The Midwest CASC is a consortium of higher ed and natural resource institutions, the ninth such partnership in the **U.S. Geological Survey's** national CASC network. As CASC Communications Manager, you'll be in charge of developing, implementing, and evaluating the center's first communications program. You will develop and manage a new website; coordinate email, social media, and media relations; and execute strategies to share the work of the Midwest CASC and its partners, including developing a variety of outreach-oriented communications products and tools.

We are looking for a professional who:

- Has experience leading – or relevant to leading – a communications program, including developing and evaluating the effectiveness of strategies, plans, and tactics
- Has strong writing, editing, and design skills, which would lend themselves to creating a variety of compelling content
- Has an orientation toward relationships and who can collaborate effectively with a wide range of stakeholders and partners

**Application
Deadline:
January 17, 2022
11:59 p.m.**
