JOB ANNOUNCEMENT

Position available with Fort Collins fisheries/aquatic consulting firm:

Full-time Fisheries/Aquatic Biologist. Graduate with minimum of BS in Fisheries, Zoology, or Biology field. Would consider qualified May 2022 graduate. Previous job experience in fisheries/aquatic sciences preferred. Must have clean driving record. Start date end March/April 1st time frame (later if new grad).

Duties include various types of work during the field season for lake management projects, aquatic sampling in streams and lakes, fish transport and stocking, water quality testing, performing aquatic vegetation identification and treatments, macroinvertebrate sample processing in the lab using specific protocols, data entry, etc. In addition to technical abilities, we are seeking candidate with some experience pulling trailers, operating boat/outboard motors, 4-wheelers, and other small equipment. Must be detail oriented and able to work long days and flexible schedule during the field season.
