

# 9<sup>th</sup> IB & Finance Paper Development Workshop "Advancing Interdisciplinary Perspectives in IB & Finance Research"

Hosted at King's Business School, London

In collaboration with Vienna University of Economics and Business (WU - Vienna)

September 23<sup>rd</sup> 2022

### Deadline for extended abstracts or full papers: July 15<sup>th</sup> 2022

The workshop is expected to be held physically but may be converted into a digital format if travel remains restricted because of the Covid-19 pandemic.

For the ninth consecutive year, we invite researchers to join their efforts and creativity in developing papers at the **intersection of International Business and Finance**. The workshop is designed to connect junior scholars to like-minded peers, and to offer hands-on guidance from senior faculty from the fields. The workshop is co-organized and financially supported by the Department of Global Business and Trade at WU Vienna and King's Business School (King's College London).

## Aim and Background of the Workshop:

IB researchers increasingly call for further integration of Finance and IB (Agmon, 2006, Cumming, Filatotchev, Knill, Reeb, & Senbet, 2017, Puck & Filatotchev, 2018). The goal of the 9<sup>th</sup> IB & Finance Paper Development Workshop is to create an interactive forum for both IB/Finance researchers. We also encourage contributions from Strategy, Accounting and Management with international and/or Finance perspectives. Potential topics include, but are not limited to:

- Current topics in managing and financing international business activities (e.g., Brexit, global protectionism, economic disintegration)
- Governance and international finance (e.g., risk behaviour, agency cost)
- Institutional context and international finance (e.g., liability of foreignness in capital markets, local financial context, legitimacy, isomorphism)
- International capital structure and internal capital markets (e.g., diversification, international transfer pricing, arbitrage, taxation)
- Ownership effects on internationalization (e.g., family ownership, institutional investors, sovereign wealth funds)
- Financial risk management in internationalization (e.g., hedging, trade finance, risk reporting)
- International strategic finance (e.g., listing location, location specific financial advantages, project finance, syndication)
- Firm level issues in financing internationalization (e.g., SMEs, MNEs, EMNEs, born globals, export finance and FDI finance, joint ventures)
- Integrating IB and Finance theories (e.g., TCE, RBV, OLI, real options, agency and institutional theory).

#### **Contacts and Further Information:**

Jakob Müllner Institute for International Business, Department of Global Business and Trade Welthandelsplatz 1 / D1. 5. OG, 1020 Wien Tel.: +43-1-313 36-4374 E- Mail: jakob.muellner@wu.ac.at
