3 credits, Spring 2023

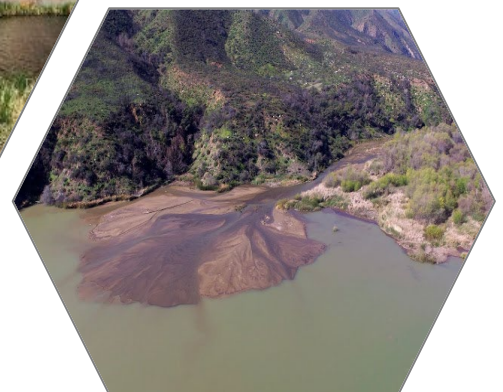

Fire & Environmental Quality

- *How have humans interacted with fire throughout time?*
- *Why are fires occurring from the Arctic to the Amazon?*
- *How does fire impact soil, air, and water quality?*
- *What is the future of fire?*

Discover the answers to these questions and more as we explore the fundamentals of fire and its role in the Earth system. Course content will draw on multiple disciplines and provide examples from land use systems around the globe and across time. Assignment topics will be tailored to individual student interests to best serve undergraduate & graduate student programs.
