Position Available: Entry-Level Environmental Scientist

Triterra is a professional environmental consulting firm that specializes in brownfield development, environmental consulting, and natural resource management services. Triterra is currently seeking an Entry-level Environmental Scientist with 0-2 years of experience to join the Lansing, Michigan office.

The primary role of this full-time job will be to support the Natural Resources and Environmental Due Diligence Groups. Job duties include field work, environmental site assessments, and consultation for property transaction and development projects.

Responsibilities:

- Complete Routine Wetland Delineations during the active growing season (approximately April through October)
- Prepare Part 50 and Part 58 NEPA Environmental Assessments
- Prepare Endangered Species Desktop Assessments
- Prepare Phase I Environmental Site Assessments (ESAs), Transaction Screens, Record Search with Risk Assessments, Baseline Environmental Assessments (BEAs,) Plans for Due Compliance, etc.
- Conduct Phase II ESA subsurface investigations including soil, groundwater, and soil gas sampling as well as surface water, storm water, and sediment sampling and characterization studies.
- Compile and evaluate data for technical reporting, site characterization, and/or need for additional assessment.
- Assist in quality assurance/quality control on aspects of technical reports (tables, analytical, figures, etc.).
- Perform tasks within project scope, budget, and schedule
- Provide support to project managers and clients.

Job Requirements:

- Minimum of bachelor's degree in Plant Biology, Fisheries & Wildlife Management, Conservation Science, Environmental Science, or related scientific field.
- Strong organizational skills and attention to detail; thorough and careful research skills.
- Excellent verbal communication, technical writing, and interpersonal skills.
- Ability to think and work independently, multi-task, solve problems, work well under pressure in fast-paced situations, form opinions and make decisions.
- Ability to receive constructive criticism, maintain openness to learn, and collaborate with team members.
- Ability to work outdoors in a range of weather and environmental conditions, alone or in teams
- Proficient in Microsoft Office, Excel, and Adobe Acrobat.
- Valid Driver's license required

Preferred Skills:

- Experience with plant identification - knowledge of common native species and invasive species in the Midwest.
- Working knowledge of ArcGIS
- OSHA 40hr HAZWOPER training

Interested individuals should send a resume to Meredith Crane, Senior Scientist | Manager of Natural Resources meredeth.crane@triterra.us
