Water-Energy-Food Nexus Collaborative Learning School, Chesapeake Bay Watershed, June 2024

The Collaborative Learning School (CLS) is a field-based workshop led by U.S. and African scientists and practitioners. The CLS connects participants with farmers, policymakers, and other stakeholders at the community level to assess food security challenges and identify innovative solutions using the water-energy-food (WEF) nexus framework.

Who can apply?

Applications are invited from early career researchers (at minimum PhD in process with Masters completed, or early career researchers up to 5 years after PhD was granted) from the US, African, or EU countries with research or activities directly related to WEF Nexus themes. We encourage applicants from a broad set of disciplines (biophysical, social sciences, engineering, and others).

Application deadline 15 December 2023
